New Ovation Medical Walker

Inspired Innovation

The Ovation R&D design team has delivered breakthrough after breakthrough for years. This uniquely passionate team is led by experienced Orthopedic professionals. As a result, fundamental Orthopedics meets inspired design. The new Ovation walker is a perfect example. This ultra low profile walker with its intuitive, natural gait is like nothing else available providing higher maneuverability and stability. Combined with unique pre-contoured calf, malleolar and heel relief areas, no other walker comes close to your patients' **predictable** trauma needs. Please try it for yourself. Wear any of the competitors' walkers and then try ours. A few steps and you will immediately "feel" the difference, after that you will settle for nothing less.

Ultra Low Profile Design

Ultra Light Weight Design

Through the use of new materials and a relentless pursuit to cut weight while increasing strength, the new Ovation ultra low profile walker is the lightest walker on the market.

Intuitive Sole

- Ultra Low Profile
- Smooth Natural Gait
- Ultra Light Weight

Intuitive Contoured Sole

The new breakthrough Intuitive Sole naturally tracks with your patients' unique and individual gait patterns.

Uniquely Sculpted Design

Unique Pre-Relieved Frame Design

The Ovation Medical walker's unique pre-shaped ergonomic frame follows the natural contours of the foot and ankle, offering additional pre-relieved contact areas for both the malleoli and the heel for predictable patient sizing/swelling patterns.

Smooth Natural Gait

Providing a balanced low profile, wide platform for stability in every environment, the edgeless sole automatically adjusts to your patients' ever-changing gait patterns through-out the healing process.

Common rigid edged sole.

Intuitive Self-Tracking sole.
