

Elevate

To the Next Generation

Generation 2

The World's Most Advanced Walker

The all new Generation 2 Walkers are masterworks of engineering. Inspired by the pursuit of perfect function and anatomical precision, the dynamic re-design delivers a new level of comfort and performance that **stands without rival.**

Break-Through Pneumatic System

Revolutionary Shock Absorption

Sure-Grip™ Stable Resting Surface

Light Weight/ Extremely Low Profile

Meticulously Tailored Frame

Innovative Contoured Sole

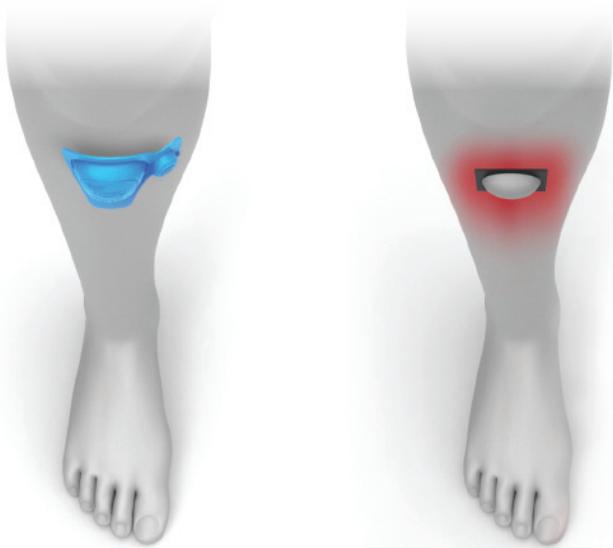

Gen2

State-of-the-Art Pneumatic Pump System

It's brilliantly simple. Gen2's ergonomic pump and integrated single push-button release eliminate the out-dated twist valve and inflation bulb system. Furthermore, the new patient-friendly pump is contoured and repositioned to eliminate the pressure and discomfort associated with typical pneumatic walkers.

This amazing new system has rendered every other pneumatic pump obsolete.

Gen 2 Curved Pump

Typical Flat Pump

Revolutionary Shock Absorption

Introducing the Shockpod™. The world's first energy retaining structure designed specifically for walkers. With the Shockpod™, **an incredible 50% less energy is transferred to the injured limb upon heel strike.** The result is an outstanding level of patient comfort that feels and functions more like a high end athletic shoe.

Sure-Grip Stable Resting Surface

It just makes sense. Patients are instructed to elevate injuries (R.I.C.E.)

The Sure-Grip™ Stable Resting Surface, exclusive to Gen 2, provides stability and **prevents the limb from slipping when elevated.**

Precisely Engineered Intuitive Sole

Beautifully fashioned and purposefully formed to reflect the natural anatomical curves, Gen 2's edgeless Intuitive Sole™ naturally adapts to your patient's individual gait pattern.

The result is a remarkably fluid and efficient stride with **complete balance and mobility.**

Flawlessly Balanced Low Profile

This is exactly how it should be. The Gen 2 walker sole virtually eliminates leg length discrepancy. The result is dramatic. Your patients **no longer need to tolerate the discomfort of high profile walkers.**

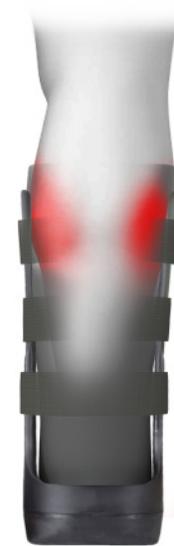

Ultra-Light Weight Meticulously Tailored Frame

Every detail has been refined. Fashioned out of an engineering grade composite material, Gen 2 is remarkably light-weight yet extraordinarily durable. The uniquely tailored frame is sculpted to comfortably accommodate the wide variety of patient shapes and sizes.

There has never been a walker that is better designed to the patient's needs.
